FACT

BENEFIT

Luxuriously soft foam and ultra-tough coils create the perfect sleeping partner.

Soft touch covers provide an unmatched luxurious feel, all supported by a stable Heritage Bonnell Coil system and polyurethane foam layers for optimal sleeping support.

A durable and comfortable mattress.

The spring unit is constructed using the classic Bonnell hourglass shape. This ensures equal distribution of tension throughout the entire spring unit, while each coil is double-knotted, top and bottom to increase strength and durability.

Dual-sided quality mattress.

Firm, reconstituted foam, high density foam and fibre surround both sides of this mattress to provide better surface comfort.

Double-tempered coils for extra durability.

These coils are more durable than non-tempered coils and offer more stable support for heavier weight. This unit is perfect for persons with a larger build or those who require firm support.

Six-turn coils for classic comfort.

The 6-turn coil has 33% more working wire than a 5-turn. This allows more support and interaction with the body, thus elevating pain in your joints.

Luxurious fillings for a deep and restful night's sleep.

The mattress is upholstered in a soft touch knitted ticking and micro-quilted fibre and foam. For additional comfort there is a secondary memory foam layer providing optimum support.
